

Remember, it all started with a sperm...

Company Profile

Advanced Agricultural Technologies (A-Tech),

a division of Medical Electronic Systems, Ltd., is a leading edge company specializing in rapid, automated semen analysis and related products for the veterinary market. The Company's comprehensive line of animal Sperm Quality Analyzers (SQA), related dosing and data management software, disposables and complimentary products are sold through an extensive network of international distributors. A-Tech has offices in the U.S., Europe and Israel.

In 1993, Medical Electronic Systems, Ltd., A-Tech's parent company, began manufacturing a unique line of sperm quality analyzers which were able to accurately characterize and analyze sperm cell concentration, motility and normal morphology for HUMAN sperm.

In 2007, A-Tech was formed as the agricultural/veterinary division of Medical Electronic Systems, Ltd. Shortly following the formation of A-Tech, four animal sperm quality analyzers and dosing software were released to the international market: BULL, HORSE, PIG and TURKEY. Other applications are currently under development.

With **over 3000 SQA's in use globally**, Medical Electronic Systems Ltd. and A-Tech are committed to providing excellent training, service and cutting edge technology to our customers, while becoming the industry standard for rapid and reliable semen analysis.
